

POTATO PETIOLE ANALYSIS MADE EASY

Potato plant tissue analysis warrants a specialized management program to realize optimal crop yield. But what if the inconvenience factors associated with this rigorous process were removed, and quality analysis was maintained to make it easy for you and your growers to focus on other crop success factors? The Plant Tissue Plus suite of products from Rock River Laboratory can do just that - helping ease the labor-intensive demands of this system with the help of a few key tools:

[CONVENIENT PICKUP ROUTES]

Based on customer's needs, potato petioles can be picked up by a Rock River Laboratory driver, customizing the route timing to your needs and improving the speed of sampling to results.

[SPECIALIZED POTATO PETIOLE REPORTS]

Accurate analysis results are provided on a potato petiole-specific report that shows results in order of sample date taken to easily identify trends.

[PLANT TISSUE PLUS APP]

This simple app makes potato petiole sample submission a breeze. Reducing human errors associated with paperwork, and improving submission timeline, the free Plant Tissue Plus app streamlines the petiole analysis process.

[SAMPLE BAGS]

These free bags are not only breathable to preserve the plant tissue until the start of analysis, but are provided with barcodes already in place to easily scan into the Plant Tissue Plus app.

Contact Rock River Laboratory today to start employing the Plant Tissue Plus tools that work best in your system.
