SMART SOIL SAMPLE SUBMISSION

[Convenience Included]

They've been known as a necessary evil, but Soil Information Sheets don't have to be cumbersome, consuming time you could be spending on management with your growers. Collecting and submitting soil samples for analysis can be easy, streamlined and quick. Now you can work smarter, not harder, with the help of web-based Soil Information Sheets from Rock River Laboratory. This tool is smart enough to:

Save your precious time:

- Exact field IDs are retained for easy upload into management software
- Printed soil bag labels eliminate filling out bags in the field
- The electronic format relieves users of hand-writing sheets
- All labels can be quickly printed when a form is completed

Organize and remember data:

- After initial saving, data is secured for future management decisions
- Data entry is driven by the user - making it accurate and customized

Reduce error and gain results:

- Typed form entry reduces errors in handwriting translation
- Autofill maintains consistency of farm information across years
- Error reduction leads to improved recommendations

Help manage your team:

- Centralized data entry improves consistency among employees and through employee turnover
- Flexes to fit your team's schedule: fill out any time before sampling, print labels, and begin sampling

Try out online Soil Information Sheets and start smart today! Existing customers simply login at rockriverlab.com and click the Soil Information Sheets button. New customers should call or e-mail Rock River Laboratory for set-up and a quick tutorial.
