

Rock River Laboratory, Inc. is pleased to announce the addition of Jen Biscoe Smith to our nutrient management plan writing team. Jen will join our staff on Monday, June 14, 2010. She will be working with our accounts in the eastern part of the state. We at the lab are excited about the skills and knowledge Jen brings to our staff.

Jen has 8 years of Agronomic experience with Larsen Coop, with the last 5 years working on the development and growth of Larsen Coop's Precision Ag Program. She is a Certified Crop Advisor, NRCS-USDA Technical Service Provider & Wisconsin NRCS Recognized Comprehensive Nutrient Management Planner since 2005. In addition to writing Nutrient Management, Comprehensive Nutrient Management and Pest Management Plans, she has experience with GPS Soil Sampling, Variable Rate Fertilizer Recommendations and GPS Equipment. Jen has experience with Ag Leader, Trimble and the Family of Precision Planting Products, including planting and yield monitors, guidance, clutch & boom control by working with her customers as well as using the technology on her own farm. Jen looks forward to working with you to improve your customer's farms and your business.

Jen was raised on a beef farm in Hastings, MN, where her family still crop farms today. She graduated in 2000 from the UW-River Falls with a B.S. in Agronomy and has been working with Wisconsin Agriculture since 2001. Jen and her husband Eric, live on a farm in Fremont, WI where they crop farm and also help on Eric's family farm. Jen enjoys the outdoors, farming, boating, snowmobiling and riding motorcycle in her free time.
